

Enter the Following New Claims:

15. A rotatable body for printing machines having rollers,
the rotatable body comprising:

a circumferential surface provided with a surface structure
and formed of a nonmetallic material, said circumferential
surface carrying a liquid and being a roller selected from the
group of rollers consisting of:

a slip roller; and

a vibrator roller for periodically contacting at least
one other roller of the rollers.

16. A printing machine comprising rollers including at least
one roller with a circumferential surface provided with a
surface structure and formed of a nonmetallic material, said
circumferential surface carrying a liquid, and said roller
being selected from the group of rollers consisting of:

a slip roller; and

a vibrator roller for periodically contacting another
roller of the rollers.
